

PROTOCOL FOR CORONA VIRUS CONDITIONS

Dr Andreas Marx

ACUTE INFECTIONS WITH SYMPTOMS:

- **PEPPERMINT OIL**, one drop on the tongue or several into warm water several times daily. **(Kills viruses and bacteria on contact.)**
- **HYDRASTIS NASAL SPRAY**, use several times daily. **(Kills viruses and bacteria on contact.)**
- **PULMONEST**, 5 drops in tepid water 5x daily.
- **MARCOZYME™***, 5 tablets 5x daily **(The high protease will decompose the ACE-2 spikes.)**

NOTE: If a patient experiences discomfort in the lower abdominal region when taking proteolytic enzymes, it may indicate a leaky gut or intestinal ulcer condition.

- When fever is present: **Para A, as directed, and Ba-Co-Flor**
- Tested positive with no symptoms present, use as Prevention:

PEPPERMINT OIL, HYDRASTIS NASAL SPRAY, MARCOZYME™

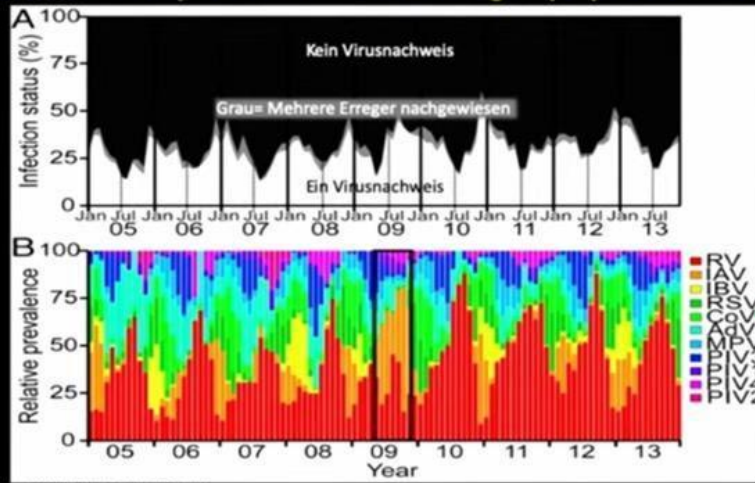

Post Vaccination Protocol

START ONE DAY PRIOR IF POSSIBLE:

- | | |
|------------------|--------------------------------------------------|
| • Peppermint Oil | Suggested use see above |
| • Marcozyme™* | 5 Tablets 3 to 5x daily (dissolving blood clots) |
| • NemaBase | 6 Tablets 3x daily (pH balance) |
| • Nepro-Rella | 12 Pellets 3x daily (Heavy Metal Binding Effect) |
| • Solidago | As directed (Kidney drainage) |
| • Viscum | Protects the Vascular System |
| • Cerebro PTC | Protects the Brain |

***Warnings:** Proteolytic enzymes (Marcozyme™), due to their fibrinolytic actions, have to be prescribed with caution for patients using blood thinners.

Relative Virusprävalenz bei ARE in Glasgow (UK) 2005 to 2013.

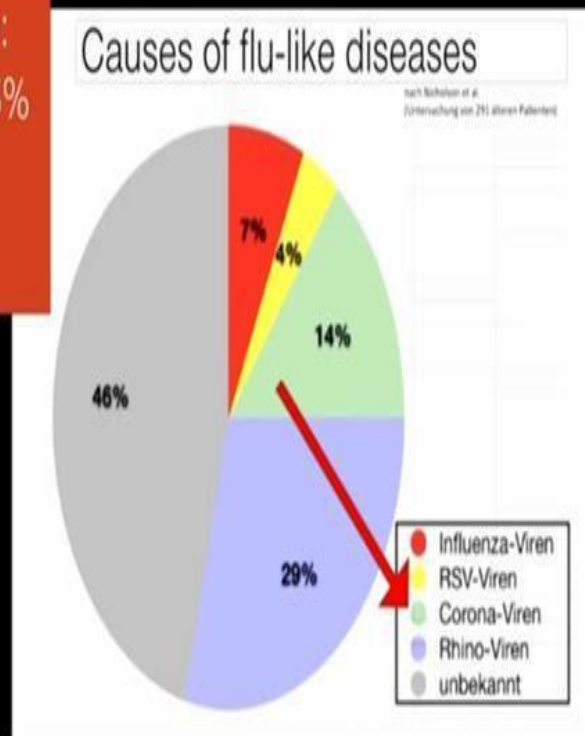

Samuel Nicholson et al. PNAS 2018; 116:52714-52719

PNAS

The green parts refer to the coronavirus that was always in the mix.

Retirement home:
Normally 7% - 15%
of viruses are
coronaviruses

So now we know that coronaviruses always make up 5% to 14%
of all flu viruses
